

RxSCAN 

Patient Safety Quality Assurance

Closing the loop on Medication Distribution

Pharmacy Solutions for Your Specific Need

Background

RxScan is a privately held corporation, established by a pharmacist whose primary goal was to bring barcode scanning technology to the pharmacy profession. The company offers products that improve medication handling in pharmacy environments and create sustainable change.

RxScan's solutions save lives every day while also providing pharmacy staff with peace of mind.

Our Mission

As part of our commitment to excellence, we give every client genuine customer service and reliable tech support. Having been in business for over 15 years, we continue to operate on two fundamental principles:

- Provide patient safety and quality assurance for medication prep and distribution
- Continue to deliver accurate and efficient solutions that are affordable for any health care setting regardless of size

Our Services

RxScan remains committed to providing the most innovative products for your medication preparation and distribution. Our goal is to provide the most up to date technology with a simple user interface at an affordable price. RxScan has the ability to develop customized solutions, to fit almost any client's need.

Working to reduce **risk** and liability while **protecting** you and your staff.
